

## Iso-Flex CP Series Aluminum Expansion Joint Cover

**PRODUCT DESCRIPTION**

The CP Series Cover Plate is designed to provide an attractive yet economical solution for expansion joints openings. All systems have a serrated surface and beveled edges for a safe non-skid condition. The CP Series can be used where the floor is concrete or in conjunction with many floor finish materials. The CP Series cover is extruded with 6063-T6 aluminum alloy and is secured on one side of the floor with a countersunk anchor. Typical systems utilizes 1/4" flathead anchors @ 18" O.C. All CP Series cover plates are provided in 10 Ft. standard lengths.

Recommended areas for usage include; warehouses, manufacturing facilities, retail space, stock rooms, doorway thresholds, and retrofit applications. The system is intended for pedestrian and light vehicle traffic.

SYSTEM TYPE	JOINT OPENING (W)	PLATE WIDTH (A)	TOTAL MOVEMENT	PLATE THICKNESS (T)
